*Lemur catta*  
*Pandinus imperator*  
*Grammostola rosea*

Meet our cast of animal friends in this up-close, interactive live animal experience. We have created Canada's first curriculum based live animal presentation in consultation with teachers and conservational facilitators. We will educate and entertain your students with remarkable and amazing facts about the animals and the world in which they live. This high energy show will have you hopping out of your seats, slithering up to the stage, and smiling from ear to ear.

Our grade 1 through 4 show hits on topics such as characteristics and needs of living things, growth and changes in plants and animals, as well as habitats and communities.

The grade 5 through 8 show discusses diversity of living things, interactions within an ecosystem, and the physiology of our creatures in comparison to our own.

Finally, we offer an adult presentation geared to high school students and adults alike. This show reflects social behaviour, interactions, adaptations, constant evolutionary progression, predator/ prey relationships, and much more.

In addition to our shows we offer an abundance of related educational material, activities, and book lists on our website under our 'teacher' tab.

Please visit [www.bowmanvillezoo.com](http://www.bowmanvillezoo.com) and click on the Teachers section for complete overview of our Grade Specific Information.
